WORK EXPERIENCE

Freelance Web Developer

Self-Employed

03/2020 - Present

- Built socket.io-based multiplayer bridge app that allows four players to play bridge online (<http://adammajor.com/examples/bridge>).
- Built an angular 12 replay viewer app for the aforementioned multiplayer bridge app, allowing players to easily review games played and view overall statistics based on the games they have played (<http://adammajor.com/examples/replay>).
- Built a c# application to synchronize music playlists after an Android OS update that rendered my previous playlist syncing app unusable (<http://adammajor.com/examples/playlist-syncer>)

Technology Services Support Rep I.TS Field Support

Ricoh Ltd.

07/2019 - 06/2020

Japanese multinational imaging and electronics company

- Worked with clients to resolve issues related to their multi-function device (configured, troubleshot, installed, and repaired multi-function devices).
- Secured two contracts with clients by going the extra mile to ensure customer satisfaction.
- Increased productivity by 10% by automating repetitive firmware-update-related tasks.

Tech Support / Office Admin

Independent School District 622

07/2007 - 07/2018

- Served a uniquely-diverse set of individuals including seniors learning how to read, single-parent mothers, incarcerated youth earning their G.E.D., refugees learning English, and professionals earning certifications.
- Created VBA macros to automate report generation, reducing the time-to-complete by more than 80%.
- Created Excel UserForms to reduce test correction duration by 75%.
- Used Excel UserForms to create a reporting system to meet teachers' report-related needs.
- Resolved various technical issues related to software, hardware, and printing.
